## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 98-105, drawn to a method for assaying cell movement.

Group II, claim(s) 106-110, drawn to a cell assay system.

Group III, claim(s) 111-113, drawn to a cell assay kit.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature is a multiwell plate to which cells are delivered and detected when they move to another location in the wells.

Xu (2005/0112544) entitled "Impedance Based Devices and Methods for Use in Assays" teaches in paragraph 9 a system adapted for monitoring cell movement in wells. In paragraph 90 suspensions of cells were added into the wells. In paragraph 188 various types of multiwell plates can be used. In paragraphs 216-217, laser ablation masks are used to make the electrode structures in the wells. In paragraph 333 a device for monitoring cell migration has a first area for cell attachment where the cells migrate from the attachment area to another area and are detected. In paragraph 340 compounds that affect cell migration can be studied.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Please inform the examiner of all related applications, pending, allowed or abandoned.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pham (6,171,780) teaches multiwell plates with masks.

Murphy (7,018,838) teaches cellular assays.
